

11 December 1967

## MEMORANDUM FOR THE FILE:

SUBJECT: Project Resistance

1. [redacted] and [redacted] have met to discuss the requirements for assembling materials to be used by the writer in preparing the report requested by the DD/S.

2. Based on the D/OS' suggestions, the division of work responsibility will be as follows:

[redacted] Will levy a requirement on the OCI Watch Office for any information reflecting on foreign support or relationships by, to or with the existing U.S. radical student movement; Will examine the materials held by [redacted] relative to protests against CIA recruiters and extract pertinent information not already included in OS files.

[redacted] Will levy a requirement on the field offices for omnibus type information on campus unrest, causes, etc., not limited to the present requirement for reporting opposition to CIA recruitment and research. Incoming material from this source will be processed by [redacted]

[redacted] Will extract pertinent materials from existing OS files relative to the requirement; will maintain the card file to be established for inputting data from his research and that of Mr. [redacted] and [redacted] will monitor the Communist press, etc. for additional material relative to the requirement. Preparation of final report.

3. The major problem to be surmounted in preparing the data base for the study is the nature of existing records at both CIA and the FBI. The information is indexed by name and organization only, thus limiting recovery to personal memory and those files of an omnibus nature where page by page review and extraction is possible.

4. [redacted] will devote most of his work period to the project. [redacted] and [redacted] will conduct their assignments on a part-time basis due to the essential requirements of their normal assignments.

[redacted]
